

WASHING INSTRUCTIONS - KAPOK DUVET / PILLOW

We recommend washing the kapok duvet / pillow at 30 degrees to save the climate, but if needed, it can also be washed at 60 degrees.

After wash it is important to tumble-dry the product. Put the product in the tumble-dryer 2-3 times for 20-30 minutes and take out the product in-between and shake it and sort the fibres by hand, as they will be clumpy when they are wet. It could be an advantage to use laundry balls in the tumble-dryer.

A kapok duvet / pillow will never be 100% the same as before wash, but this has no effect on the quality of the product and the kapok will maintain its good properties.
